I. GENERAL

A. PROJECT DESCRIPTION

The Boyd Deep Canyon Desert Research Center and Sweeney Granite Mountain Desert Research Center are located in the United Nations Mojave and Colorado Desert Biosphere Reserve. As part of the Natural Reserve System these field stations are responsible for studying and teaching about the exceptionally rich environment and all its inhabitants. Both field stations have the benefit of being located in an environment full of beauty but it also has the challenge of extreme conditions in temperatures, winds and local wild life. Any new structure built must be of the highest performance to deal with said condition.

Access to the Boyd Deep Canyon Desert Research Center is through the adjacent city Palm Desert. The field station facilities and new Tevis Education Center are located roughly 2 ½ miles south of The Reserve Country Club. Sweeney Granite Mountain Desert Research Center is about seventy miles west of Needles, CA, east of Amboy and 4 ½ miles north of highway 40. The field station is in a very remote location and special attention must be paid to the coordination of crews, materials and equipment.

U.C. Natural Reserve System Mission – The mission of the Natural Reserve System is to contribute to the understanding and wise stewardship of the Earth and its natural systems by supporting university level teaching, research and public service for the protection natural areas throughout California. More information about the Natural Reserve System can be found at www.nrs.ucop.edu.
