

3.0 PROGRAM

3.1 BUILDING PROGRAM

As noted in the introduction to this report, a series of meetings was held with the Planning Committee members, both individually and as a group, to identify program space needs. These were translated into room sizes and types for each of the user groups. The method was as follows:

1. Identify activities for which space is needed.
2. Provide a distinct name for each required room or space.
3. Develop an estimate of assignable square footage (asf) per each room or space.
4. Summarize these needs by major user and occupancy group.
5. Develop total building area.

A Great Place At the Center of it All
